Version Control | Git, Github

Miscellaneous | MySQL, OOP, Data Structure

Soft Skills | Delivery results, Team Player, Bias for action

PROJECTS

Expense Management System

- Developed an efficient expense management system for streamlined expense tracking.
- Implemented by C++ for intuitive expense management.
- Achieved a 30% enhancement in expense tracking accuracy and reduced expense management time by 40%

Mental Health ChatBot

- Created a mental health chatbot to offer support and guidance to individuals coping with mental health issues.
- Utilized machine learning algorithms with TensorFlow, Keras, and Transformers for an interactive chatbot experience.
- Enhanced accessibility to mental health resources, leading to a 30% surge in user engagement and a 20% uplift in user-reported mental well-being.

Railway Reservation System

- Streamlined ticket booking processes through the development of a railway reservation system.
- Leveraged Django and MySQL to create an efficient platform for booking train tickets.

CERTIFICATES

- Udemy Python Certificate - 2023
- Tableau by IIPC - 2023
- Livewire C programming Certificate - 2023
- Udemy MySQL Certificate - 2024

COURSEWORK

- Data Structure and Algorithm
- Machine Learning
- Web Designing
